

TEAM BEAN 1833

Sponsorship Packet

ABOUT US

Forsyth Robotics Inc. (FRI) is a nonprofit organization founded in 2024, with roots going back to 2005. On behalf of FRI, we would like to invite you to sponsor and join Team 1833 for our upcoming FIRST Robotics Competition (FRC) season. Your contribution would help Team 1833 to provide an opportunity for every student in Forsyth County - regardless of background or experience - with the tools, confidence, and community to become the next generation of supportive leaders and innovative problem solvers.

In 2024, we started from scratch, and worked hard to purchase robot parts, tools, and equipment to allow our remarkable students to take their STEM education to the next level. We are always in need of materials, electronic components, marketing supplies, and funding to support these students' passion for building robots. Sponsoring our team connects your business with our students, their families, and their broader network. It also provides essential resources for competitions and outreach initiatives.

Each time students reach a new level of competition, win an FRC award, or apply for scholarships through FRC, they celebrate as a team. They remain dedicated to achieving their full STEM potential, even through challenges, with the support of experienced and encouraging mentors. They form lasting connections that extend well beyond high school. For example, our students gain hands-on experience in design, manufacturing, programming, project management, strategic thinking, marketing, outreach, grant writing, budgeting, and collaborating with industry professionals in engineering, programming, and business. They then use these skills to inspire the local community through summer camps and classroom STEM activities.

Our budget for the upcoming season, which includes robot parts, competition fees, tools, and equipment, is roughly $110,000. While this is a significant amount, much of it has been made possible through the generosity of our sponsors and awarded grants. These students continue to exceed expectations and are now preparing to compete again this season. We can't do this alone and hope you will join us by supporting this great program that helps students find their passion.

Our team would be incredibly grateful for your support and for the opportunity your funding would provide these dedicated students. If you are interested, please review our sponsorship tiers on the next page and visit our team's website at www.team1833.org.

SPONSORSHIP TIERS

For sponsorships from companies and families:

Platinum	• Recognition on the team website • Large company logo shown on robot and pit display • Logo on team promotional materials • Logo featured on team apparel • Recognition in the official team announced at competitions • Showcasing robots at company events	$10,000+
